TECHNICAL SKILLS

- Programming Languages : Python, JavaScript, Java, Kotlin, Flutter, HTML, CSS
- Databases : MySQL, MongoDB
- Frameworks : React Native, Node.js
- Related IDEs : VS Code, IntelliJ IDEA, Android Studio

SOFT SKILLS

- Teamwork & Collaboration
- Adaptability
- Time Management
- Problem Solving
- Work Ethic & Responsibility

PROFILE

Motivated second-year Software Engineering student at IIT (University of Westminster) with a strong foundation from a completed foundation course at IIT. I am currently pursuing a Software Engineering degree, eager to apply and expand my technical skills through practical experiences, focusing on software development, system design, and emerging technologies.

EDUCATION

- **BEng(Hons) Software Engineering**
University of Westminster (2024-present)
- **Foundation Certificate in Higher Education (2023)**
- **G.C.E. Ordinary Level (2018)**

Siridhamma College, Labuduwa, Galle

- English - A
- Mathematics - A
- Sinhala - A
- Buddhism - A
- History - A
- Tamil - A
- Dancing - A
- Home Science - B
- Science - C

ACHIEVEMENTS & CERTIFICATIONS

- Achieved the highest rank of President Guide in the Girl Guides Association, showcasing exceptional leadership, dedication, and service to the community.
- Certificate for completing a 7-month ICT Course at the Rural Education Development and Vocational Training Institute.
- Certificate for completing a 6-month Computer Application Assistant ICT Course at Schooner Computer Academy.
- Certificate for completing a 6-month English Course at British Council

LANGUAGES

- English
- Sinhala

PROJECTS

VelociRoute – Fullstack Mobile Application for Cyclists

- Built a React Native mobile app for route planning, activity tracking, and weather monitoring.
- Developed the backend with Node.js & MongoDB, implementing RESTful APIs.
- Integrated multiple APIs (Google Maps, Places, Directions, Tomorrow.io) for enhanced functionality.
- Implemented Firebase authentication for user sign-in and security.
- Designed an image processing model to classify road conditions using static street-view images.

Personal Finance Tracker

- Developed a Python application with a Tkinter GUI for personal finance management.
- Implemented CRUD functionality to add, view, update, and delete transaction details (amount, type, description, and date).
- Designed persistent storage using a JSON file, ensuring data is saved between sessions.
- Added search and sorting features to help users efficiently track income and expenses.

Student Activity Management System

- Designed a Java-based program to help university staff manage student records and module results.
- Developed a menu-driven interface to add, delete, search, sort, and save student records.
- Implemented automatic summary file generation to provide an organized overview of module performance.

Life Below Water – Website

- Developed an interactive website to promote awareness about marine conservation.
- Designed a visually engaging UI using HTML, CSS, and JavaScript, with a blue-themed design symbolizing ocean conservation.
- Collaborated with a team to build informative sections, animations, and interactive content.

EXPERIENCE

Software Engineering Intern (6 Months)

Airport & Aviation Services (Sri Lanka) (Pvt) Ltd – Bandaranaike International Airport

- Project technical documentation
- UI/UX design using Figma
- Frontend development and implementation
